mall translation device for flight control

The controller follo s a reference trajectory using feedbac .

A positive stability margin does not guarantee safety under all disturbances.

The sampling frequency is 100 Hz and the measured delay is 0.02 s.

KConservez the identifier CTRL-2026-A and the signed value -0.25 unchanged d .

The reinforcement learning policy minimizes the trac ing error.

```
J = 0.25 * e^2 + 0.02 * u^2
```

ynthetic assembly created by the project. MIT. This is not a quotation ta en from an article.
